

Why Google Reviews Matter More Than Ever

Did you know your Google Reviews now directly impact where your business shows up on Google Maps? That's right — Google's latest algorithm update puts a major emphasis on **consistency** over quantity or even longevity in business.

Gone are the days when just having a long track record or high-star rating guaranteed you a top spot in the coveted "Top 10" results for searches like "**(Your Niche) Near Me.**" Today, it's all about **how often** you receive reviews — not just how many.

But What If You Don't Have Many Clients?

Don't worry — chances are, you already have a circle of people who know and trust you. Think about your church, your job, your neighborhood — anyone who can vouch for your character and work ethic. That's a review waiting to happen.

The Secret Weapon? A Custom Google Review App

Studies show that businesses using a **custom Google Review app** have the highest success rate for improving their ranking on Google Maps. But we get it — "custom app" might sound expensive.

That's Where Dealey Media International Comes In
